# **1 Adding Outlines**

In this document, we will add outlines using the PyPDF2 library.

## 2 Installing PyPDF2

Before we proceed, make sure you have PyPDF2 installed. You can install it using the following command:

```
pip install PyPDF2
```

### 3 Using `add_outline_item`

To add outlines to the document, we will use the `add_outline_item` method from the PyPDF2 library.

## 4 Viewing Outlines

After adding outlines, you will see the table of contents (outlines or bookmarks) in the left sidebar.

## **5 All Set!**

You've successfully added outlines to your document.

## **6    section 8**

Page 8 content goes here.

## **7   section 9**

Page 9 content goes here.

## **8   section 10**

Page 10 content goes here.

## **9   section 11**

Page 11 content goes here.

## **10    section 12**

Page 12 content goes here.

## **11    section 13**

Page 13 content goes here.

## **12    section 14**

Page 14 content goes here.

## **13    section 15**

Page 15 content goes here.

## **14    section 16**

Page 16 content goes here.

## **15    section 17**

Page 17 content goes here.

## **16    section 18**

Page 18 content goes here.

## **17   section 19**

Page 19 content goes here.

## **18    section 20**

Page 20 content goes here.

## **19    section 21**

Page 21 content goes here.

## **20    section 22**

Page 22 content goes here.

## **21    section 23**

Page 23 content goes here.

## **22    section 24**

Page 24 content goes here.

## **23    section 25**

Page 25 content goes here.

## **24    section 26**

Page 26 content goes here.

## **25   section 27**

Page 27 content goes here.

## **26    section 28**

Page 28 content goes here.

## **27    section 29**

Page 29 content goes here.

## **28    section 30**

Page 30 content goes here.

## **29 Conclusion**

In conclusion, LaTeX is a powerful typesetting system.
